# Testimonial Excellence Boost Project

# What is Excellence Boost?

EXCELLENCE BOOST project was a project that aimed to create capable teachers and educational organisations ready to face the challenges of the 21st century. The project implemented the path to excellence in 2 key areas:

- Enabling educators personal growth
- Cultivation of organisational excellence

This Project brought together 4 African Countries and 4 European Countries, and Tanzania was fortunate to attend with 4 representatives passionate about learning and drive of organisational effectiveness.

Through this training we were able to observe learner centre approach which meant prioritising students needs and also got to understand how to assess organizations using the KNOWLO assessment platform. We conducted our training session spaced out from South Africa, Nigeria, Latvia & Slovakia.

During the project we were fortunate enough to visit schools in Africa and in Europe and conduct in depth assessment on the difference in educational systems, what are the loopholes and what was to be improved.

- 
- Enhance teaching practices through the access to learners-centred framework and wrtitting tools KNOWLO
  - Enhance digital literacy and established sustainable framework for continuous proffesionals development in both Africa and Europe
  - Proffesional development and confidence trainings , job shadowing events and through multiplier events
  - Assessment and feedback from partners
    - Networking and Collaboration

# Benefits From The Project

## 1. The Importance of Learner Centered Approach:

Where the learner is the key point of focus. Reflecting back to Tanzania, we have seen that most of our syllabus is outdated, learners are cramming instead of actually enjoying school.

## 2. KNOWLO Assessment

As part of the training we were exposed to a valuable tool called the KNOWLO assessment tool that helps any organization to be able to assess themselves where on their weaknesses, strengths and areas of improvement.

# Implementation Strategies

- Capacity building programs through training workshops to cover assessment strategies and digital tool
- Digital transformation training teachers to use KNOWLO for assessment and by encouraging VET teachers to co-develop digital content by content creation lab
- Leadership and management training strategic planning workshops guide VET managers in institutional development
- Monitoring, evaluation and sustainability includes quarterly review meetings, sustainability

# Challenges of the project

- Digital literacy KNOWLO assessment tool
- Visa issues to get visa to travel for project work
- Lack of cooperation for government institutions
- Ability to apply for the project as Africa coordinator ,the application for the project are only for European

## KEY RESULTS

- Participants of the project 128
- Participants in local capacity building 417
- KNOWLO platform 760 professionals and 460 self assessment
- Multiplier event participants 302
- Widespread dissemination online 100,000 plus
- Website visit 130,000
- Stakeholders engagement 473

Through our newly founded NGO called YAWAO (Youth and Women Action Organization) we plan to spread more awareness. Since after the training we have had various multiplier events with different schools, women and young people to ensure that we impart the knowledge to our fellow Tanzanians.
